Type Package

Title Two Games to Relieve the Boredom

Version 0.1.0

Author Xiuwen Wang

Maintainer Xiuwen Wang <wangxw36@mail2.sysu.edu.cn>

Description There are two interesting games in this package, one is
2048 games(for windows), using up and down to control the
direction until there is a 2048 figure. And the other is 'what
to eat today',preparing for people who choose difficulties,
including most of the delicious Cantonese cuisine.

Contents

---

run2048 *The 2048 Game*

Description

The adjacent numbers can be added if they are equal. When the maximum number reaches 2048, you win.

Usage

```
run2048()
```

Examples

```
run2048()
```

---

runfood *What to Eat Today*

Description

A small program is used to decide what to eat today, and currently only contains delicious Guang-dong dishes.

Usage

```
runfood()
```

Examples

```
runfood()
```
